

GRANDMA ROSIE

Grandma Rosie is a 16 year old mare, the mother of Dot, and the Grandmother of Ramsay. Grandma Rosie joined us in May with Dot. We were told Grandma Rosie had 10 babies and we are happy that she will get to kick up her hooves as she will never have another baby. As with Dot we were worried that she might have lice so Alysha Bartlett shaved her but she was clean, though her tummy was very fat and full of worms. Grandma Rosie's teeth are also a mess but as it does not appear to affect her eating we will leave them be. Rosie is on a diet and will continue to be forever as she has foundered likely many times. Grandma Rosie has respiratory troubles and coughs a great deal.

Grandma Rosie's name was chose like Dot's in a contest at an Elementary School. Rosie was the name put in by a grade five student and Grandma was a nickname Michelle had already given her... so Grandma Rosie it is. Grandma is a full of vitality and spirit, she is a soft and kind soul. Grandma's heart is not choosey she seems to love everyone equally and enjoys the visits, though her health is a concern. When we were searching for a home for Annie and were so lucky to have met with an Edmonton Vet, Dr. Burko who was more than happy to take in both the mares and attend to their medical needs, we were delighted. Grandma Rosie is doing wonderfully at her new home and with Dr. Burko's help she is breathing easily. Thank you...
