

TUG

Tug is our first Hearts & Hooves horse, in fact he was bought by Michelle at an auction as a meat buyer was bidding him on! Tug lived at the Kjenner Farm with the big horses long before Hearts & Hooves had become a reality. Tug shows many signs that indicate his earlier years were likely not spent with people who loved or cared for him. Tug continues to struggle with some of his memories and misconceptions of people... but with much time, patience, and love he is coming to trust people again. Like people horses that have experienced trauma do not easily forget and often continue to carry those scars.

Tug feels most at home in the pasture and so we respect this and so Tug was adopted out the Yorke family and he is doing very well with his other palomino friends.
